

CorelDRAW Introduction

Course #: CD-200 **Duration:** 1 day

Prerequisites

None.

Details

Upon completing this course, students will understand the various elements of the CorelDRAW interface. They will be able to create, format, manipulate and transform graphical objects, create and manipulate text, work with color palettes, enhance a drawing, and work with printing options.

Software Needed

- CorelDRAW® 2018 or higher
- Microsoft® Windows®
