

Sass

Course #: CSS104 **Duration:** 2 days

Prerequisites

CSS experience is helpful but not required for this course.

Details

Sass (Syntactically Awesome Style Sheets) is a growing CSS extension language that is compatible with all versions of CSS. This course starts with an HTML and CSS background review, and then it dives into Sass. You learn Sass syntax as well as how to organize and include Sass code, nesting, and how to use Sass variables.

Software Needed

Sass

Outline

Sass

- **Introduction/Why Sass?**
 - The Problem Sass Solves
 - Benefits of Sass
 - Code Organization
 - Performance
